

ADBLUE – WHAT IS IT ?

- **All Commercial Vehicles - Trucks, Buses & Industrial Vehicles (above 7.5 tonnes) - Manufactured after October 2006 are fitted with a new SCR technology (Selective Catalytic Reduction)**
- **This technology requires the vehicle to use AdBlue which will reduce noxious emissions from the exhaust stream**
- **AdBlue will be sprayed into the exhaust stream of Euro IV and Euro V Vehicles at a proportion of around 5% to Diesel fuel.**
- **The AdBlue is placed in a designated AdBlue tank on the vehicle with its own gauge and sensor system.**
- **This product requires special handling; please ask one our staff for advice and information on dispensing equipment, other pack sizes available.**
- **Available in 5 lt, 10 lt, 210 lt and 1,000 lt packs.**
